Professional Summary

Computer Science & Engineering undergraduate graduating in 2027 with an 8.5/10 CGPA and hands-on experience developing backend and full-stack applications through technical internships and academic projects. Skilled in Java, Python, Node.js, FastAPI, REST APIs, PostgreSQL, AWS, object-oriented programming, data structures, algorithms, and database management. Strong foundation in software engineering, problem solving, debugging, and designing reliable applications with a focus on scalability and security.

Education

Bonam Venkata Chalamayya Engineering College, Odalarevu CGPA: 8.5/10 | 2023–2027

B.Tech – Computer Science & Engineering

Sri Chaitanya Junior College 67% | 2021–2023

Intermediate (MPC)

Experience

AWS Cloud Computing & DevOps Intern May 2026 – Jul 2026

APSSDC Internship Program

- Gained hands-on experience with AWS cloud services, application deployment, and DevOps workflows.
- Worked with cloud infrastructure concepts and applied AWS services to practical software deployment activities.

AI/ML Intern

Jun 2026 – Present

Infosys Springboard

- Working on AI-enabled software development projects focused on technical problem solving and practical application development.

Web Development Intern

Jun 2025 – Jul 2025

VaultofCodes

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Built reusable components and managed project development using Git and GitHub.

Projects

FoodLink – Smart Food Donation & Distribution Platform Node.js, Express.js, PostgreSQL, AWS

- Developed a full-stack platform connecting food donors with NGOs through role-based workflows and donation tracking.
- Designed and implemented RESTful APIs using Node.js and Express.js with PostgreSQL for structured application data.
- Integrated AWS EC2, S3, DynamoDB, and SNS for cloud deployment, storage, file management, and notifications.

ParkShare – AI-Enhanced Community Parking Marketplace React.js, TypeScript, FastAPI, PostgreSQL

- Built a full-stack marketplace for discovering and booking verified parking spaces using React.js and TypeScript.
- Developed REST APIs with FastAPI, PostgreSQL, SQLAlchemy, and JWT authentication for secure application workflows.
- Integrated IBM Granite models for intelligent recommendations with a deterministic fallback to maintain application functionality.

Finance Data Processing & Access Control API

Node.js, Express.js, PostgreSQL, Prisma

- Developed a backend REST API for finance data processing using Node.js, Express.js, PostgreSQL, and Prisma ORM.
- Implemented JWT authentication and role-based access control for Viewer, Analyst, and Admin users.

Technical Skills

Programming Languages: Java, Python (Basics), JavaScript, SQL

Core Computer Science: Object-Oriented Programming, Data Structures, Algorithms, Complexity Analysis, DBMS, Operating Systems

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases: PostgreSQL, Amazon DynamoDB, SQLAlchemy, Prisma ORM

Cloud & DevOps: AWS EC2, Amazon S3, Amazon SNS, Render, Nginx, PM2

Web: HTML5, CSS3, React.js, TypeScript

Tools: Git, GitHub, VS Code

Certifications & Achievements

- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
- Full-Stack Web Development Bootcamp – Udemy
- Software Project Management – NPTEL (Elite)
- Salesforce Administrator with AI Agentforce Specialization
- ServiceNow Virtual Internship
- Published research on Blockchain-based News Verification – IJEDR, 2026
